

Pet Import Checklist

Used in conjunction with The Caribbean Pet Guide by Kathleen Gallagher, available on the Doyle Guides mobile app.

MICROCHIPPING

My pet has been microchipped for the first time on or after March 1st, 2019, with an ISO-compliant (15 digit, numerical) microchip, OR my pet was microchipped before this date with an ISO-compatible (10 or more alphanumeric characters) microchip.

- I have proof of the date of microchip implant (e.g. proof of payment, a microchip implantation certificate).
- The microchip can be read (check with your vet).
- I know the anatomical location of my pet's microchip.

PHOTOGRAPH

- I have a current, color, full-body photo of my pet(s).

RABIES VACCINATION

- My pet was vaccinated in accordance with the guidelines of the manufacturer and island.
- The rabies vaccination certificate has the make, serial number, date of expiration, and period of validity listed on it.

- My pet was vaccinated against rabies after it was fitted with an appropriate microchip.
- The microchip number has been entered correctly by the veterinarian on the rabies vaccination certificate.

FAVN RABIES TITER TEST (if applicable)

- The blood sample was taken (at least 30 days) after the rabies vaccination.
- My pet has had a satisfactory blood test at an approved laboratory, which was performed during the last 12 months.
- I have a copy of the blood test result showing the correct microchip number and the date the blood was drawn.

DOCUMENTATION

A licensed/accredited veterinarian has correctly filled in the veterinary health certificate. The certificate has been endorsed by an official government veterinarian if legally required by the exporting country and both showing the microchip number.

TICK AND TAPEWORM TREATMENT

My pet was treated on the day of examination for the veterinary health certificate with approved treatments and time frame prior to travel. The products used to treat for ticks and tapeworms have been recorded on the veterinary health certificate.

TRAVELING TO THE CARIBBEAN BY AIR

- My pet(s) must travel according to the rules of the airline (IATA), and my carrying container and paperwork conform to IATA rules and regulations.
- Pet ID tags, leash, and collar should be affixed to your pet's crate if traveling by air. Pets should not wear a collar in cargo during a flight due to the risk of entanglement or strangulation.
